EXPERIENCE

Market Strategy Analyst Intern , Sound of Earth, Los Angeles, United States	02/2026 – Present
- Analyzed marketing and audience data across 5+ platforms using Excel and Google Sheets to identify growth opportunities, content performance gaps, and segment-level behavior patterns. - Built a 4-layer audience prioritization framework and translated findings into targeting, messaging, and go-to-market recommendations for 3 cross-functional teams, supporting 2 strategic initiatives. - Supported outreach to 10+ artists for collaboration and interview opportunities, helping expand external engagement and improve content and partnership development.	
Content & Program Support Intern , Lifeline Express Foundation, Beijing, China	07/2024 – 09/2024
- Developed audience-facing communication materials and structured summaries to support outreach, engagement, and program visibility across 5+ initiatives. - Coordinated workflows, schedules, and deliverables to improve execution quality and support clearer communication with stakeholders.	

PROJECTS

Marketing Performance & Lead Quality Analysis (Tuango)	01/2026 – 02/2026
- Queried and analyzed data from 418,160 users using SQL & Python to identify conversion barriers, segment-level response quality, and drivers of marketing effectiveness. - Built KPI summaries and a testing-driven decision framework that reduced outreach by 56% while increasing response rate to 14.48%, delivering 7.9× improvement in business performance.	
Growth Funnel & Segmentation Dashboard (Pentathlon)	02/2026 – 03/2026
- Analyzed 600,000 customer interactions using Python to identify segment-level demand patterns, response differences, and growth opportunities across categories. - Built Tableau dashboards and recurring performance summaries to visualize trends, compare outcomes, and support data-driven prioritization. - Increased expected revenue by €1.21M (+42%) through data-driven optimization of targeting and allocation decisions.	
Retention & Customer Value Analysis (S-Mobile)	02/2026 – 03/2026
- Analyzed 600,000 customer data using Python to evaluate retention drivers, customer value, and long-term behavior. - Built large-scale (1M users) outcome models to uncover key drivers and thresholds, informing lifecycle strategy and business decisions, and delivering clear recommendations with stakeholder-ready visualizations.	

PROFESSIONAL AFFILIATIONS & LEADERSHIP

Director of External Relations , Business Student Association, Suzhou, China	03/2022 – 03/2023
- Led execution of initiatives involving 200+ participants, managing timelines, coordination, and operational processes. - Developed outreach strategies and drove 400+ member growth, tracking engagement and improving outcomes.
